

Gage Zero

EV CHARGING FOR YOUR DRAYAGE FLEET

Convenient Locations

Charging sites are strategically located in and around ports and near distribution centers.

Reliable Charging

We offer maintenance services and uptime guarantees for chargers so your drayage fleet stays up and running.

No Upfront Capital Required

We invest the upfront capital, negotiate competitive rates, and manage incentives to keep your total cost of ownership as low as possible.

Experienced Partners

Our team of EV industry experts helps you navigate the electrification process so you can focus on your operations.

Gage Zero develops, owns, and operates electric truck charging depots near ports for drayage fleets for a flat, monthly fee with **no upfront costs**, including:

Charging – at our hub or on your site, with energy management

Grants and incentives – our team finds public funding to lower your capital costs

Electric trucks – leasing, financing, and maintenance via our partner network

We accommodate fleets of all sizes including multiple classes and types of electric trucks at a single site.

We Manage the Complexity

1

SITE ACQUISITION, DESIGN, & PERMITTING

2

CONSTRUCTION & COMMISSIONING

3

UTILITY CONNECTION, UPGRADES, & RATES

4

SOLAR GENERATION & BATTERY STORAGE

5

OPERATIONS & MAINTENANCE
